DETAILED ACTION

The receipt is acknowledged of applicants' amendment filed 10/01/2004.

Claim 4 has been canceled, and claims 32-38 have been added. Claims 2, 3, 5-8, 10, 13, 18-31 have been withdrawn.

Claims 1, 9, 11, 12, 14-17, and 32-38 are included in the prosecution.

1. This application contains claims drawn to an invention nonelected with traverse in the response filed 03/12/2004. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 103

2. Claims 1, 9, 11, 12, 14, 15, 16, 32-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berg in view of Cilento.

3. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Berg in view of Cilento and further in view of Chen.

Art Unit: 1615

The rejections have been discussed in details in the previous office action and are maintained for reasons of record.

Response to Arguments

4. Applicant's arguments filed 10/01/2004 have been fully considered but they are not persuasive.

Applicants traverse the rejection of the claims over Berg in view of Cilento and further in view of Chen by arguing that Berg does not teach the ratio of propylene to ethylene in EPDM. Berg does not teach EPDM in the layer in contact to the skin. Cilento teaches substituting PIB by butyl rubber. No motivation to modify or combine the references.

In response to applicants' argument regarding the claimed ratios, the examiner position is that discovering the optimum or workable ranges involves only routine skill in the art since it has been held that where the general conditions of a claim are disclosed in the prior art, *In re Aller*, 105 USPQ 233. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., EPDM is not in the skin contact layer) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by

Art Unit: 1615

combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the teaching of Cilento of the advantages of the wound dressing containing butyl rubber would have motivated one having skill in the art to add this ingredient to the dressing of Berg. Note that PIB is taught by Berg, and Cilento is relied upon for teaching additionally adding the rubber.

In considering the disclosure of the reference, it is proper to take into account not only the specific teachings of the reference but also the inferences which one skilled in the art would reasonably be expected to draw therefrom. *In re Preda*, 401 F.2d 825, 826, 159 USPQ 342, 344 (CCPA 1968). The rationale to modify or to combine the prior art does not have to be expressly stated in the prior art; the rationale may be expressly or impliedly contained in the prior art or it may be reasoned from knowledge generally available to one of ordinary skill in the art. The reason or motivation to modify the reference may often suggest what the inventor has done, but for a different purpose or to solve a different problem. It is not necessary that the prior art suggest the combination or modification to achieve the same advantage or result discovered by applicant. *In re Linter*, 458 F.2d 1013, 173 USPQ 560 (CCPA 1972).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
